Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The combination of the features of independent claim 1 is neither known from, nor rendered obvious by the available prior art (Article 33 (1) - (3) PCT). The reasons are as follows: none of the documents cited in the search report suggest how to solve the problem of how to control usage of metadata in combination with a content in a flexible manner in order to eg. control type of usage depending on the "sensitivity" of the content.

Independent claims 43, 44 and 46 are the corresponding respective receiving apparatus, transmitting apparatus and computer program product to the method of claim 1 and are therefore new and inventive (Article 33 (1) - (3) PCT) for the same reasons as above.

Claims 4-15, 22-42 are dependent on claim 1 and claim 45 is dependent on claim 43 and as such also meet the requirements of the PCT with respect to novelty and inventive step (Article 33 (1) - (3) PCT).
